Eric:

Folks going from RERT - Las Vegas:

Gregg Dempsey  
Wesley Boyd  
Roger Goodman  
Gary Spradlin  
Douglas Sharp  
Lyndsey Kelly  
Natalia Brooks  
Fernando Gomez

Gomez is in Vermont on EPA business and will join us on Wednesday night.

We're bringing 4 fed vehicles: our Mobile Command Post, a large "box" delivery style truck (equipment), a Ford Escape hybrid, and a Chevrolet pickup. We might need to rent or use something you all bring for field team vehicles, but we'll see.

If you can get that analytical lab set up through your Weston contractor, great, otherwise, we're able to handle filter samples at our National Air and Radiation Environmental Laboratory (NAREL) in Montgomery, AL. The analyses I'd recommend are gross alpha, gamma spectroscopy, and specific plutonium (plutonium takes several days).

More as I get it.

Gregg Dempsey  
Senior Science Advisor  
U.S. Environmental Protection Agency  
Radiation and Indoor Environments National Laboratory  
Las Vegas, Nevada
